

PRIVATE-DOOR ASSISTANT

A Helping Hand

A Major Challenge...

...With an Affordable Solution

Enriches Residents' Quality Of Life

Encourages Independence

The Private-Door Assistant enriches your residents' lives and enhances your facility's image!

Private-Door is a signature amenity that your current and prospective residents will see as an exceptional service to enrich their lives.

Sometimes an obstacle is not recognized until the solution becomes obvious. Private-Door is the solution to the obstacle a door becomes for residents who use wheelchairs, walkers and canes. With Private-Door, you provide your residents with an essential enhancement to their apartment. Private-Door gives residents the ability to enter and exit their residences uninhibited.

A necessity for wheelchairs and scooters

Individuals who use wheelchairs or scooters may find the door to their own residence a barrier to their freedom of movement and socialization. Opening and closing an apartment door while maneuvering in a wheelchair can be extremely frustrating and very defeating. Private-Door eliminates this frustration while promoting independence.

Essential for those who use canes or walkers

The most common assistive devices are canes and walkers. Residents who use them have difficulty opening and closing spring-loaded doors when they enter or leave their apartments. The potential for a serious fall also exists for these residents. Private-Door minimizes these concerns for your residents. With Private-Door, you enhance your organization's image as one that truly recognizes and provides for the needs of its residents.

Features

Private-Door is specifically designed for senior living. Private-Door includes these features:

- **FreeFloat System:** When the door is operated manually by guest or staff, Private-Door will Free-Float providing uninhibited, resistance-free movement.
- **Obstruction Sensing:** Private-Door stops on contact when the door encounters an obstacle and reverts to the FreeFloat system.
- **Minimum Force:** Private-Door is designed to use a surprisingly small amount of power to reliably automate a door.
- **Hold Open:** Private-Door will hold open most doors with spring hinges so residents can enter or exit their residence trouble free.

The Private-Door Assistant has the following exclusive features:

- Two-year warranty
- No electric strike release
- Retro-fits existing doors
- Free-Float System allows normal manual operation of the door
- Uses a standard 12-volt transformer that plugs into any outlet
