

PRIVATE-DOOR™ SYSTEM

Applications

**Provides
Independence**

Simplifies Your Day

**A Helping Hand For
Family Members**

Make a grand entrance effortlessly with the Private-Door System!

Private-Door System Features:

- **Affordably Priced**
- **Optional Remote Control**
- **Obstruction Sensing stops door on contact with an obstacle.**
- **Retro-fits existing doors. Components mount to the edge of the door, avoiding holes in the surface of the door.**
- **Components virtually disappear when painted or stained.**

Designed to automate the entrance doors to houses and townhouses affordably, the Private-Door System is the convenience that will become a necessity. The Private-Door System also removes the barriers doors are to individuals who use wheelchairs, scooters and canes.

Make life easier with remote control convenience by opening the entrance to your home from your vehicle. Avoid standing in the rain or cold while fumbling for keys to unlock your door. Private-Door System makes entering and exiting your home easy while you are holding packages or other articles.

Private-Door is not just for the entrance to your home. Private-Door has a full line of door operators that are affordably priced to automate your bedroom and home office doors, too!

The Private-Door System has the following exclusive features:

- **Two-year warranty**
- **No electric strike release**
- **Retro-fits existing doors**
- **Free-Float System allows normal manual operation of the door**
- **Uses a standard 12-volt transformer that plugs into any outlet**
